DEFINITION OF CLASS:
This is full performance level clinical veterinarian work providing medical treatment services to animals in Animal Services and Adoption Center. This is a 24/7 facility. Employees in this classification are responsible for providing direct and consultative medical care to animals, and for tending to medical needs. This includes medical examination, surgery and overall monitoring of the animals. Contacts are for the purpose of providing medical services and consultation; court and community representatives to provide consultation to discuss animals' medical problems and agree on courses of action, and to plan and coordinate the delivery of veterinary health medical services. Direct animal care services, which are provided on demand and on an on-going basis, require conducting physical examinations and the lengthy, detailed questioning of animal’s fosters in order to determine the nature of care required. Other contacts for day-to-day functions are with coworkers, citizens, veterinarians, volunteers, rescue and foster groups, and contractors.

Work is performed under the administrative direction of the Animal Services Division Director. Mastery of and competency in the veterinary field of medicine is required. A Veterinarian is medically responsible for all aspects of his/her animal's medical treatment program. Guidelines are of limited use, and the employee must consider a broad range of medical factors and issues. Decisions regarding what needs to be done require extensive examination and analysis to determine the nature and scope of animals' problems. The work involves isolating and defining unknown conditions and resolving critical problems, and impacts the well-being of substantial numbers of patients. The work is performed in the various animal holding areas and the veterinary hospital inside the Animal Services and Adoption Center. Employees in this class are exposed to hazardous conditions requiring the use of special equipment and/or adherence to special precautions. This requires the ability to work with animals, some of which are ill, aggressive, injured, rabid, or unwieldy. Good 'situational awareness' is required to reduce risk to self. This class involves considerable standing, a good amount of walking, sitting, observing, bending, reaching, and finger manipulation to provide service in various areas, to perform work functions. There is some driving required. There is some lifting of materials or animals typically weighing 20 to 75 pounds; however, some animals may weigh more. Work may involve evening hours, shift and/or weekend work.

EXAMPLES OF DUTIES: (Illustrative Only)

Staff Veterinarian (Grade 29 - Class Code 106514)
- Assure all animals in care receive prompt and proper medical care and continued monitoring for individual health and welfare.
- Manage medical and surgical care with the shortest length of stay in mind yet still in the best interest of the individual animal.
